

Scantronic IT-Lock

Easy to use, fast, effective security for PCs

Proximity card reader for PC security and AX access control enrolment reader

IT-Lock provides proximity card-based desktop security for PCs and laptops.

Simply removing the card from the small desktop reader blocks the PC and monitor instantly from unauthorised users. Unlike Windows™ passwords, the proximity card cannot be copied. IT-Lock leaves your data secure and can co-exist with Windows™ security or other third party software applications. The hard disk data remains unchanged.

Features

- Administrator passwords
- User accounts
- Wireless smart card technology
- Enrolment reader
- USB connection
- Virtual Keyboard Driver for 3rd party applications
- Privacy button

Typical Applications

- open plan offices, training rooms, colleges
- anywhere where sensitive, confidential data are stored on PCs or laptops
- HR managers and managing directors • police forces and local authorities
- banks and finance offices • cash registers

IT-LOCK

Advanced technology made simple

Mode 1 - PC Lock

IT-Lock provides proximity card-based desktop security for PCs and laptops.

IT-Lock instantly secures your keyboard, monitor and mouse and is ideal for open plan offices, training rooms, colleges and other areas where you do not want others to have access.

The privacy button in IT-Lock instantly blacks out the screen from prying eyes on confidential data and, by pressing the button again, reinstates the screen for immediate use.

The compact desktop reader connects to the USB port on your PC, requiring no external power supply or other devices. Simply install the easy to navigate software and IT-Lock is up and running.

IT-Lock Kit Contents

- 1 desktop reader
- Velcro for side mounting
- 1 user proximity card and
1 administrator proximity card
- CD with drivers and card management software
- Works with cards or tags

Mode 2 - Virtual Keyboard Driver

The desktop reader can also be used with any Windows[™] application for automatic entry of card numbers.

In keyboard simulation mode, the card number is displayed when the button is pressed. The setup software allows for hexadecimal and decimal display, card number length and position. This feature eliminates typing errors when entering long card numbers in databases or 3rd party software applications. This is ideal for enrolling cards into an AX200 system.

Minimum PC Requirements

- PC with USB port
- 400 MHz processor
- 128MB RAM
- >100MB hard disk
- CD Rom
- Windows 95, 98SE, 2000, ME XP
- PS2 Keyboard and mouse
- 8MB video memory
